(R) Regular

NL standaard poeder voor de meest gangbare toepassingen.
EN standard grade. The particles are made the correct size to suit most applications.
FR poudre standard pour les applications les plus courantes.
DE standardpulver für die gängigsten Anwendungen.

(SF) Superfine

NL fijne poeders, wel genoeg zijn voor een opstaande rand.
EN when the Regular grade powder overflows the edge of a line or a character a Superfine or "Detail" powder is required to give a crisp image. It will not give the highest raise but on a thin line it will feel just as high as the regular product.
FR poudre fine, pour accentuer des bordures.
DE feine Pulver, genug für eine erhöhte Kante.

(UH) Ultra High

NL bijzonder geschikt voor grotere oppervlakken en dubbel stevige lijnen.
EN used for the Triple Embossing Technique and when a large area is to be embossed. It will give a high raise but can't be used with regular or detailed stamps.
FR particulièrement adaptée pour les grandes surfaces et les lignes bien marquées.
DE besonders geeignet für größere Flächen und doppelte durchgezogene Linien.

(X) Mixed Particle Size

NL mix van bovengenoemde soorten en toepassingen.
EN a mix of any of the above grades.
FR mélange des poudres susnommées et leurs applications.
DE mischung der oben genannten Typen und Anwendungen.

(T) Translucent

NL niet dekkend, waardoor een onderliggende kleur het resultaat beïnvloedt.
EN these powders will allow light through them and so the colour under them will affect the finished result.
FR translucide, la couleur de fond influence le résultat final.
DE nicht deckend, daher beeinflusst eine unterliegende Farbe das Ergebnis.

(O) Opaque

NL dekkend, waardoor de onderliggende kleur het resultaat niet beïnvloedt.
EN these powders will not let light through and so when embossing they will not be affected by the colour under them.
FR couvrante, la couleur de fond n'a dons pas d'impact sur le résultat.
DE deckend, so dass die unterliegende Farbe das Ergebnis nicht beeinflusst.

(M) Marbling

NL deze poeders hebben een witte basis vermengd andere kleuren voor een marmer-effect.
EN these powders have a white base and so when moulding the white will appear producing some fantastic marble effects.
FR ces poudres sont composées d'une base blance mélangée à d'autres couleurs pour un effet marbré.
DE diese Pulver haben eine weiße Basis, die für einen Marmoreffekt in anderen Farben gemischt ist.
